

HET LIMBANI

+91 7046259573 | hetlimbani61@gmail.com | [LinkedIn](#) | [GitHub](#) | [LeetCode](#) | Ahmedabad, Gujarat, India

Summary

Full-Stack Developer experienced in building scalable applications using Django, Flask, and the MERN stack. Proficient in integrating LLMs via Groq API and deploying applications using Docker and AWS. Strong foundation in AI, ML, Deep Learning and Cyber Security, with active practice in Data Structures and Algorithms on LeetCode using Java.

Education

Bachelor of Technology (B.Tech) in Computer Science and Engineering (AI & ML) 2023 – 2027
Adani University, Gujarat | CGPA: 8.73 | Current (Semester 6)

Higher Secondary Education (HSE) – Science Stream March 2023
Percentage: 70.61% | Percentile Rank: 90.73%

Experience

MERN Stack Developer Intern June 2026 – July 2026
Covrize IT Solutions Pvt. Ltd., Ahmedabad, Gujarat

- Collaborated with the development team to design, develop, and deploy enterprise-grade healthcare modules, contributing to the successful delivery of the **CareOS Hospital Management ERP**.
- Built scalable backend services, integrated AI-powered features and automated billing workflows, while following Git-based version control and Agile development practices to deliver production-ready software.

Technical Skills

- Programming Languages:** Java, JavaScript, Python, C
- Core Areas:** Machine Learning, Deep Learning, Artificial Intelligence, Cyber Security
- Computer Science Fundamentals:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Complexity Analysis (Time & Space)
- Web Development:** HTML, CSS, React.js, Node.js, Express.js, Django, Flask
- Databases:** MongoDB, PostgreSQL
- Tools & Technologies:** Git, GitHub, Docker, AWS, Postman, Power BI, Cloud Computing, Google Looker Studio
- Soft Skills:** Problem Solving, Analytical Thinking, Team Collaboration, Decision Making, Creativity, Continuous Learning

Projects

- CareOS – Hospital Management ERP System (Internship Project)** [\[Live Demo\]](#) | [\[GitHub\]](#)
 - Developed a full-stack Hospital Management ERP using the **MERN** stack with **6 role-based dashboards**, enabling appointment scheduling, e-prescriptions, pharmacy, laboratory, ward management, and billing workflows.
 - Implemented secure authentication using **JWT**, **Google reCAPTCHA**, and **email OTP verification**, along with role-based access control and REST APIs for secure healthcare operations.
 - Integrated a domain-specific AI assistant powered by **Groq (Llama 3.3 70B)** with persistent MongoDB chat history and developed an automated billing engine to consolidate consultation, pharmacy, laboratory, and inpatient charges into unified invoices.
- Medbill – Smart Medicine Billing & Inventory Management System** [\[GitHub\]](#)
 - Developing a **React Native (Expo)** and **Flask**-based application for QR/barcode-based medicine billing.
 - Implementing **AI/ML-driven demand analysis** and sales tracking for inventory optimization.
 - Reducing manual errors and billing delays by automating workflows and improving efficiency.
- CyberGuide – Smart Cybersecurity Learning Platform** [\[GitHub\]](#)
 - Built a full-stack platform using **React.js**, **Django**, **PostgreSQL**, and **Docker**.
 - Developed isolated lab environments for tools like Netcat, tcpdump, and Nikto.
 - Integrated **Google OAuth**, OTP authentication, and a **Gemini AI mentor**, and deployed on **AWS** for scalable and secure access.
- ML-Based Solar Energy Forecasting System** [\[Live Demo\]](#) | [\[GitHub\]](#)
 - Designed a **Random Forest** model to predict solar energy output using real-time weather data.
 - Built a full-stack application using **Flask**, **React**, and **MongoDB**.
 - Integrated weather APIs for accurate forecasting and visualization.

Certifications

- AWS Academy Graduate – Machine Learning Foundation** [Credential](#)
- AWS Academy Graduate – Cloud Architecting** [Credential](#)
- AWS Academy Graduate – Cloud Foundation** [Credential](#)

Achievements & Hackathons

- Coding & Problem Solving (LeetCode)**
 - Solved **450+** **LeetCode problems** in Java, strengthening DSA and problem-solving skills.
 - Strong understanding of **complexity analysis and optimization techniques**.
- Tic Tech Toe '26 – DA-IICT, Gandhinagar (Team Leader, 48-hour Hackathon)** [\[GitHub\]](#)
 - Built **SmartCommerceAI**, an AI-based dynamic pricing and personalization engine using React, FastAPI, and ML.
 - Implemented dynamic pricing using **Gradient Boosting** and personalized recommendations with **Apriori**, delivering a full-stack solution within a 48-hour hackathon.
- Tark Shastra · Lakshya 2.0 – LDCE, Ahmedabad (Team Leader, 24-hour Hackathon)** [\[GitHub\]](#)
 - Developed **ResolveX**, an AI-powered complaint classification and SLA system using Flask, PostgreSQL, and ML.
 - Automated classification, priority prediction, and recommendations using **ML + LLM (Gemini/Groq)**.
 - Built role-based dashboards and real-time processing pipeline.
